OUTLINE

- **Human Systems Integration Defined**
- **HSI Rational**
- **HSI Project Overview**
 - **People**
 - **Process**
 - **Tools**
- **Future**

HSI - DEFINITION

Human System Integration (HSI) is:

- the technical process of integrating the areas of
 - Human Factors Engn
 - Manpower & Pers.
 - Training,
 - Systems Safety, and
 - Health Hazards
- with a materiel system to ensure safe, effective operability and supportability.

HSI Concept Development: Rationale

- Pressure and support from DND projects
- Lessons learned from previous projects
- Lessons learned from industry
- Technological requirements (SOR)
- Technological opportunity (HSI Tools)
- International cooperation and interoperability

HSI Concept: Constraints

- Minimal Resources
- Life Cycle Cost Impact, or lack thereof...
- Current Business Culture (M&S, SMART, SBA, RMA)
- Linked Efforts (dispersed responsibilities in DND)
- Depth of HSI Skill Base in CA, or lack thereof...

HSI Concept: Overview

- Mission: “The pursuit of optimal health, safety, human factors engineering and human performance through the application of HSI principles in Military systems involving the human element”.
- Represented by Logo
- HSI Capability Components
 - People
 - Process
 - Tools

HSI Concept: People

- Personnel within HSI capability:
 - HSI Coordinators
 - HSI Steering Board
 - HSI Industrial Base
- Three methods of interacting:
 - Project Conducts Own Analysis
 - Project Obtains Own Contractors
 - Project Comes to HSI Team for Support

Director Science & Technology - Human Performance

HSI Concept: Process

- HSI Process, now developed in draft form
- Links the HSI domains within the MA&S process
- Must be in accordance with the DMS

HSI Concept: Tools

- Communication
- Analysis (HSI Tools)
- Demonstrations (Tech Demo as ACTD)
- Libraries

HSI People Interviews

Individual or Group	Contact Made?		Current Status or Further Action
	Y	N	
DMSS 2-6	•		
DLR DLR Prog	•	•	Spoke with DLR 3 personnel who responded on behalf of DLR Prog. DLR will have a new M.Sc. trained Human Factors resource in September 2000 who will be the DLR point of contact for HSI.
DAR DAR Prog 3		•	Air staff would like a written meeting request with summary of aim sent to DAR, DAR Prog, DSAA, SGAFD, MPD, DAR Prog 3 and DAR Prog 2 so that they can respond as a group.
DTA 3-6	•		DTA may require letter asking permission for DTA 3-6 to participate in any formal meetings.
DSSPM DSSPM 2	•		
DSTHP DSTHP 2	•		
DNPR		•	
DLP	•		
D Air PG&T		•	
DRET	•		Spoke with DRET staff on the phone, reviewed capability descriptions and mandate of DRET 3.
DHRRE	•		
DMHRRE	•	•	Some phone discussions, but must still meet with human resource modeling analysts to discuss their techniques. Clearly DMHRRE asked by DRET community to perform manpower and personnel assessments as required.
DMPPD DMPPD 2-3		•	
DGNS		•	
DMH Svcs	•		Suggests that HSI project also talk with DMEDPol (Occupational Medicine and Preventative Medicine)
CLS Med Adv.		•	
D Air PM&S 4		•	
COS J3/Doc & Trg	•		
CFMGHQ/ACOS Ops CFMGHQ/ACOS Hlth Services		•	Major D. Van Loon appointed as contact. Some phone discussion, still must meet.
D Safe G		•	
DFS		•	
DFPPC 2 DFPPC 7-2	•	•	Spoke with DFPPC 2, still must get a meeting with DFPPC 7-2.
DBCM 2-8	•		Systems Engineering - must have continual meetings.
DBCM 2-4	•		ILS and LCC - must have continual meetings.
DCIEM OHE	•		

HSI People - Interviews

- The people are there
- The people are interested
- They need hard products to focus on:
 - Web site
 - Process
 - Team structure
- Re-visit key groups with new process soon

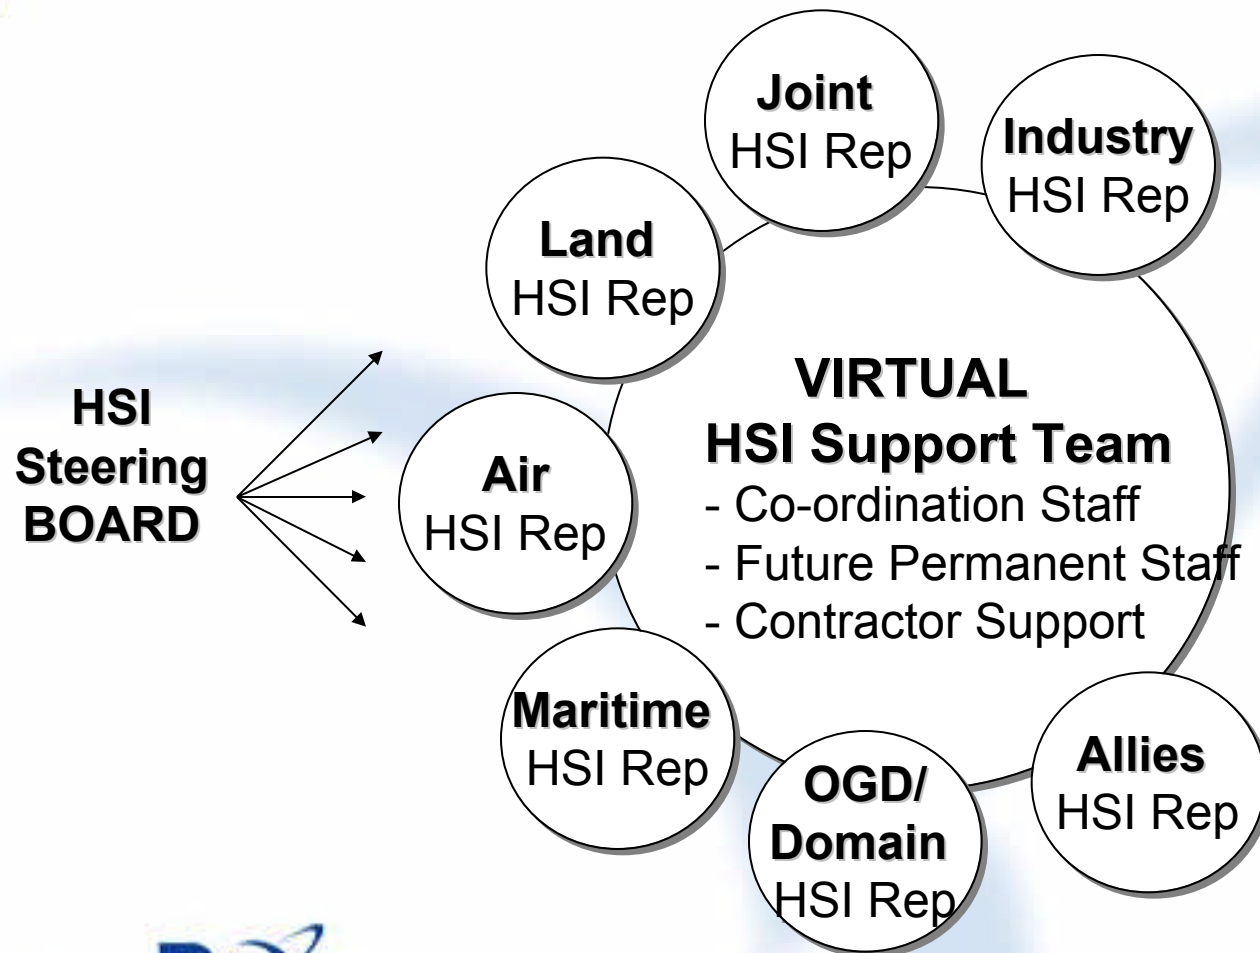

HSI People - Virtual Team

- HSI Coordinators - coordinate
- HSI Steering Board - steers
 - DBCM - authority for processes
 - DFPPC - authority for project life cycle and analyses required for decision documents
 - HSI Steering board advises DBCM and DFPPC, reps from which also sit on the board
- Interested DND Personnel, HSI Industrial Base
 - stay current through communications

Director Science & Technology - Human Performance

HSI PROGRAM - PEOPLE

HSI People - Contact Database

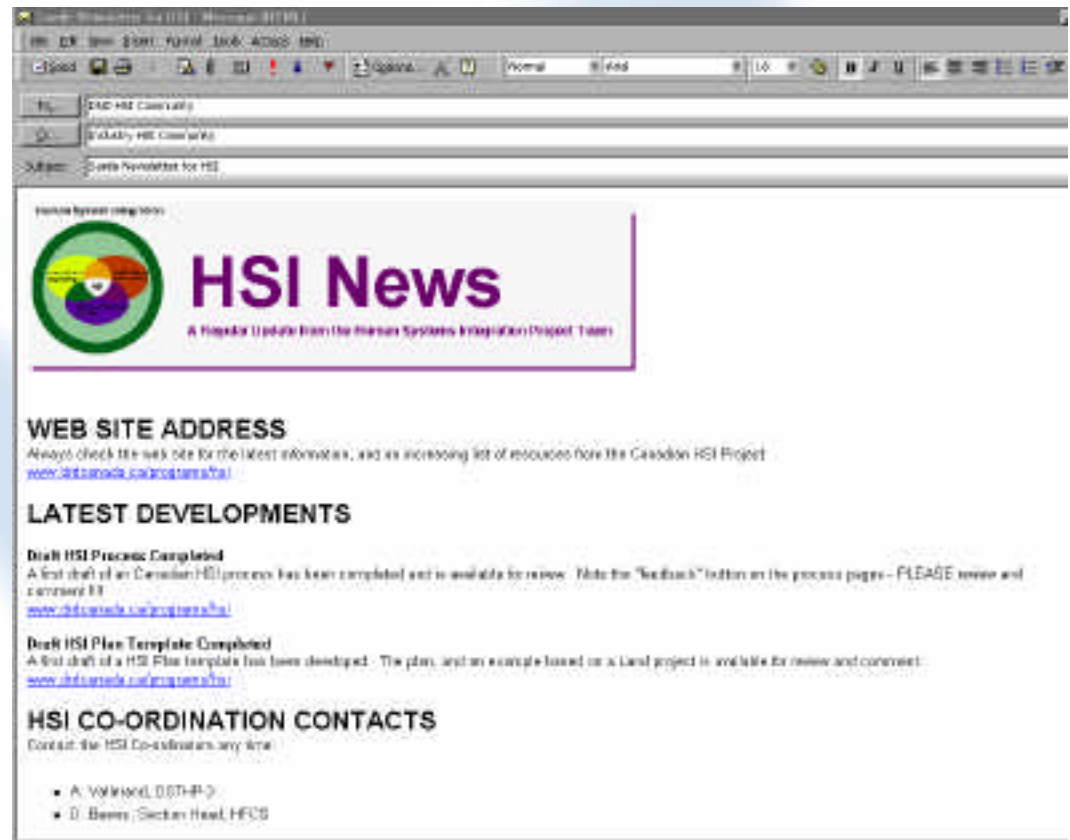

- DND Database
- Industry Database
- Register On-line
 - DND through DIN
 - Industry through WWW or Fax, called through MERX

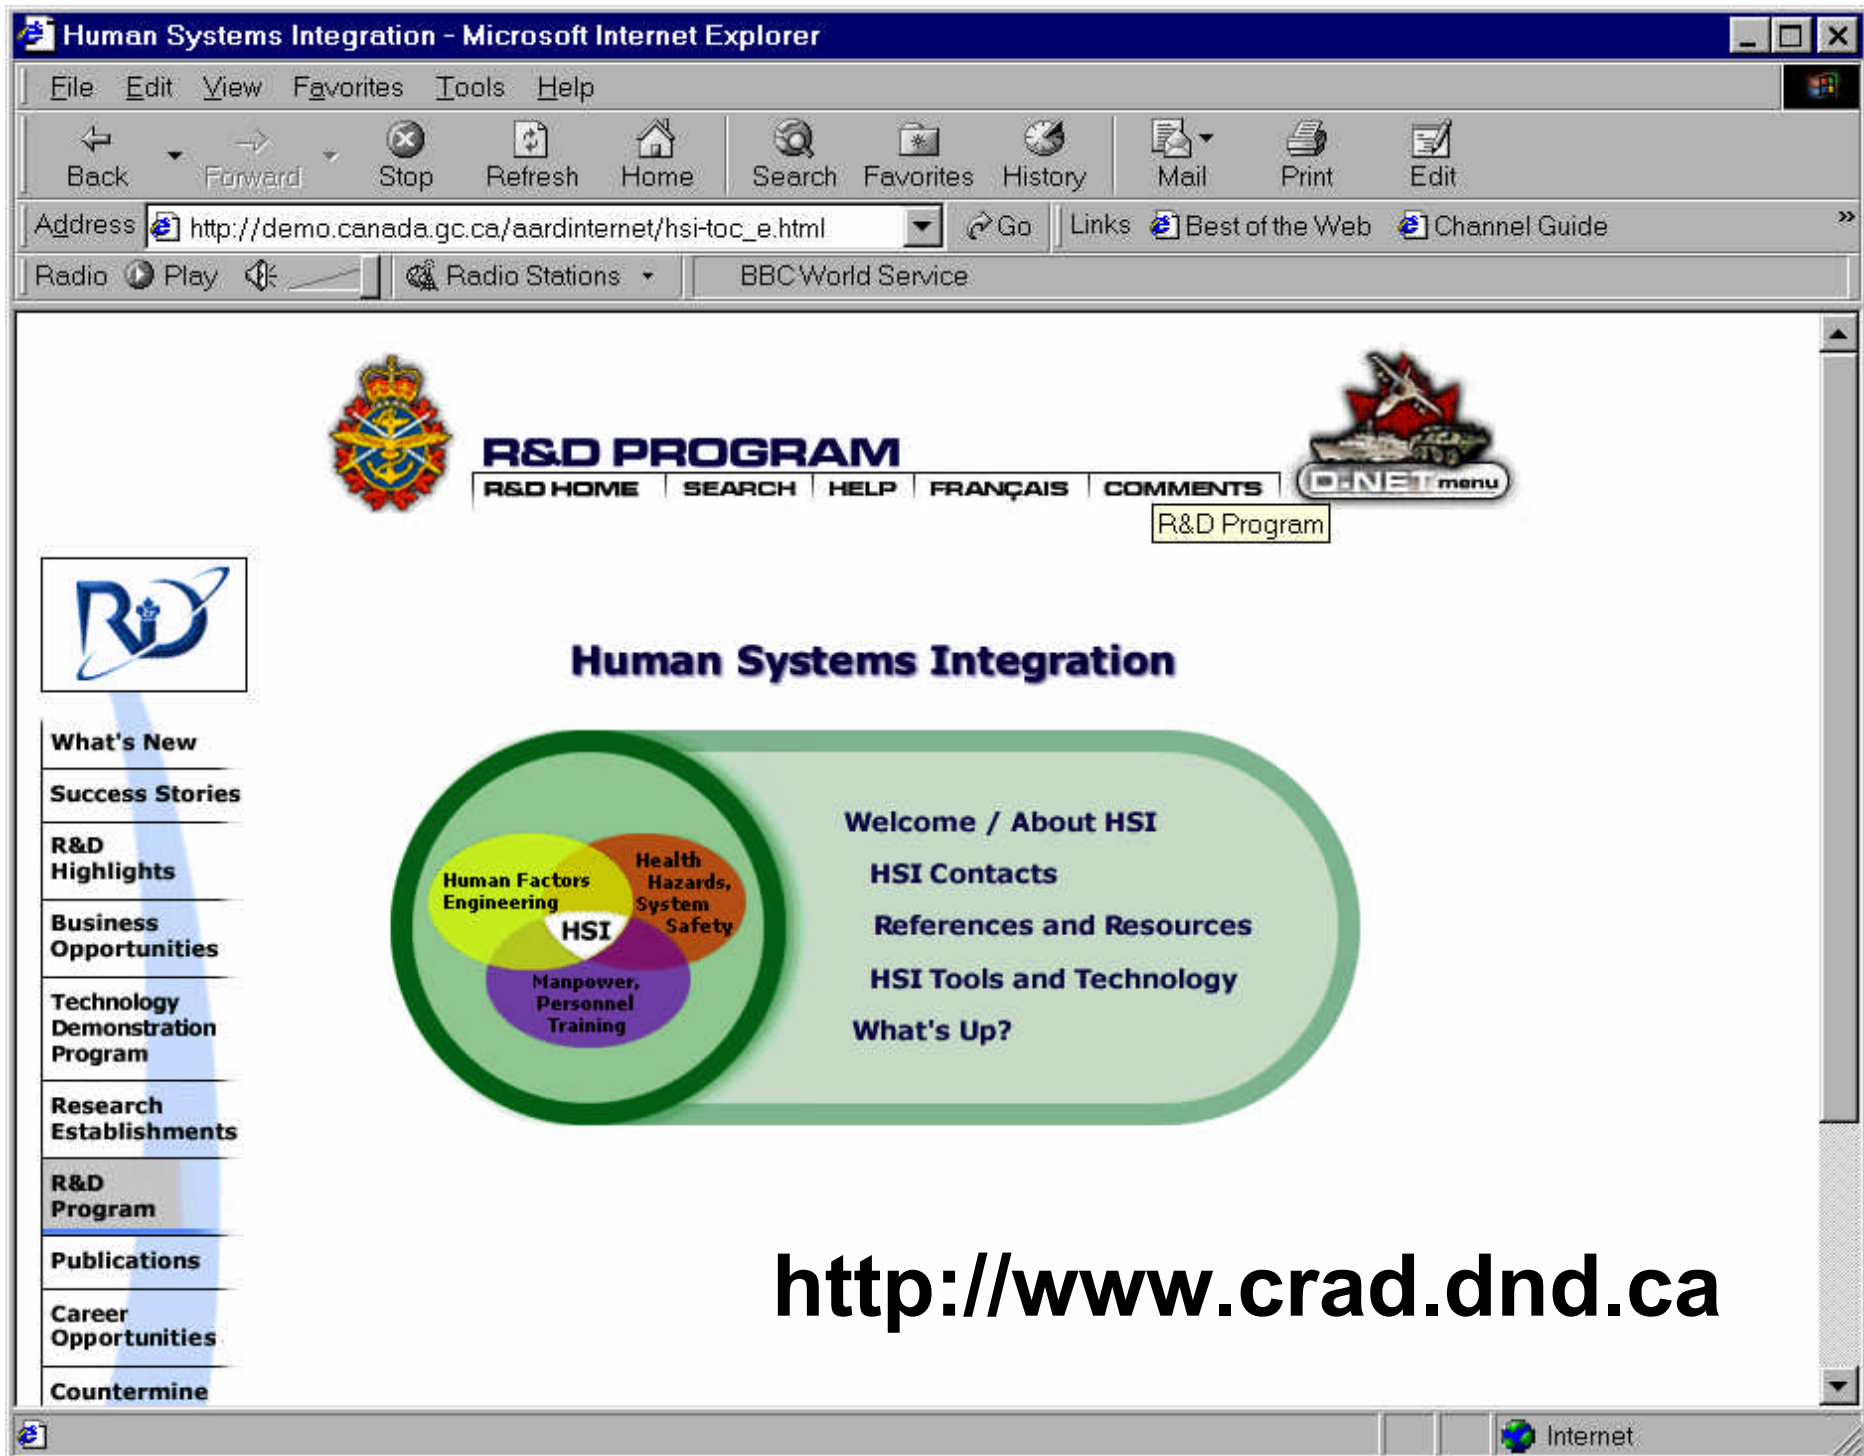

Director Science & Technology - Human Performance

HSI People - Communications

- HSI Web Site(s)
- HSI *e-Newsletter*
 - e-mail to group to remind to submit articles
 - Doubleclick to Web page
 - enter three line max article
 - newsletter automatically assembled and sent to list after due date

Director Science & Technology - Human Performance

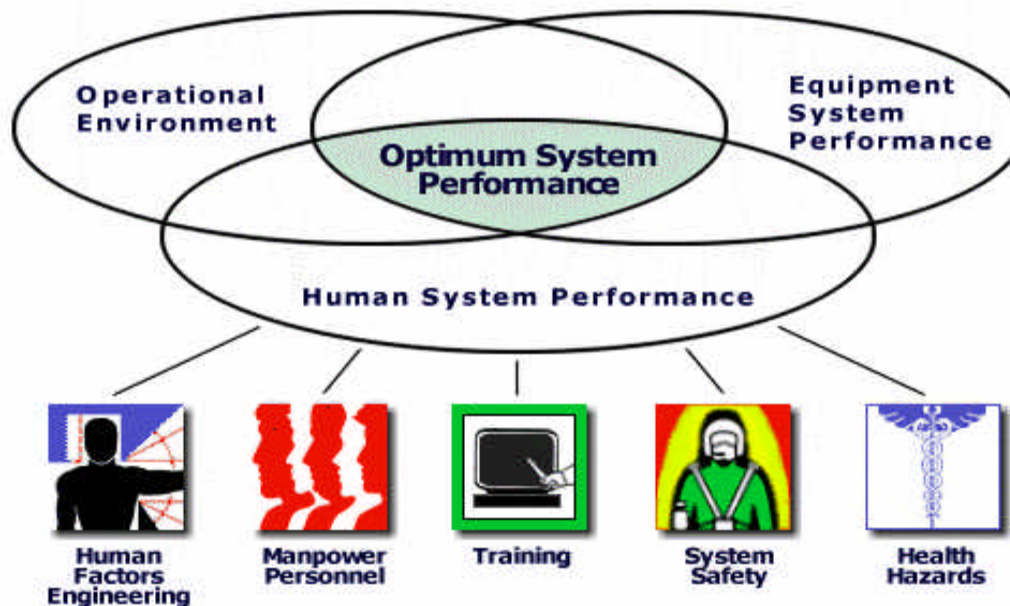

R&D INITIATIVES

[R&D HOME](#)[SEARCH](#)[HELP](#)[FRANÇAIS](#)[COMMENTS](#)

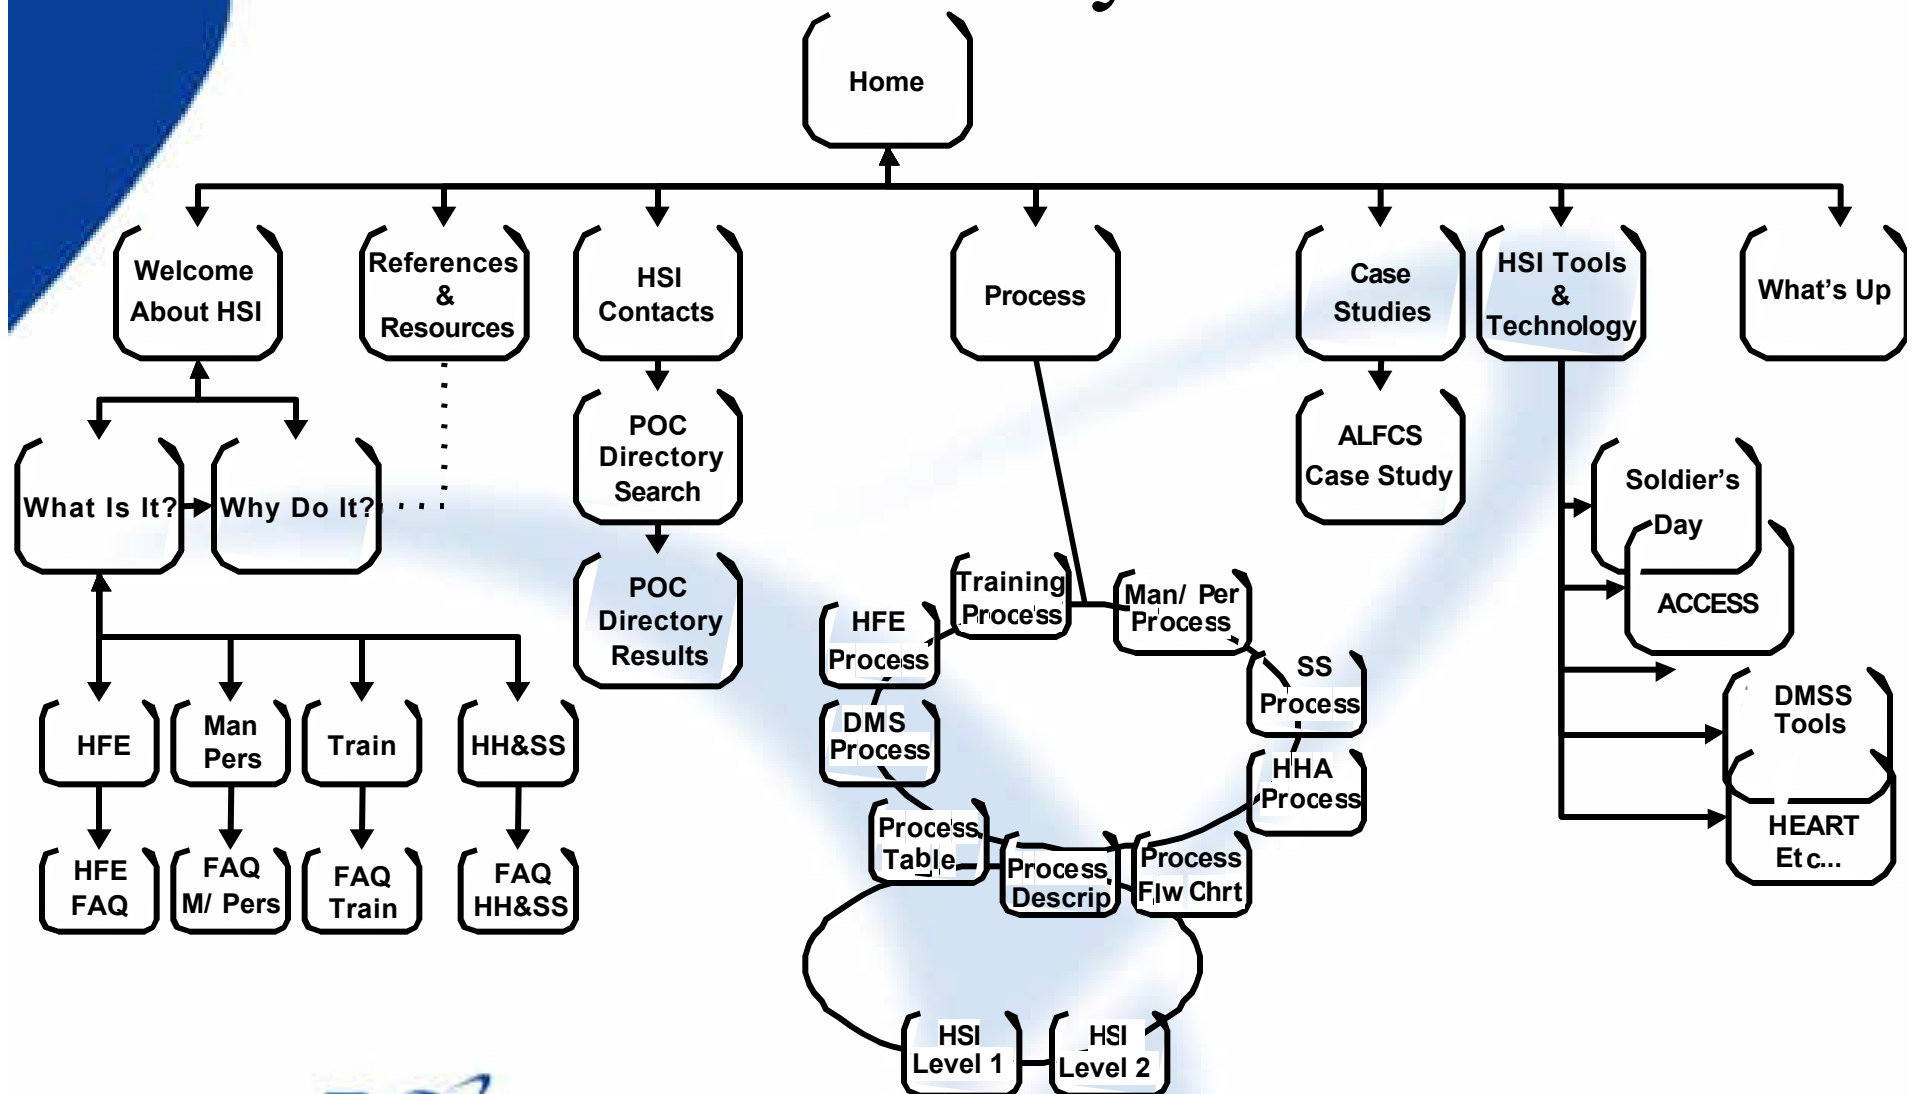

HSI  HOME

HSI

Human Systems Integration (HSI) is: "The technical process of integrating the five HSI domains, [Human Factors Engineering](#),

HSI - Web Site May 2000

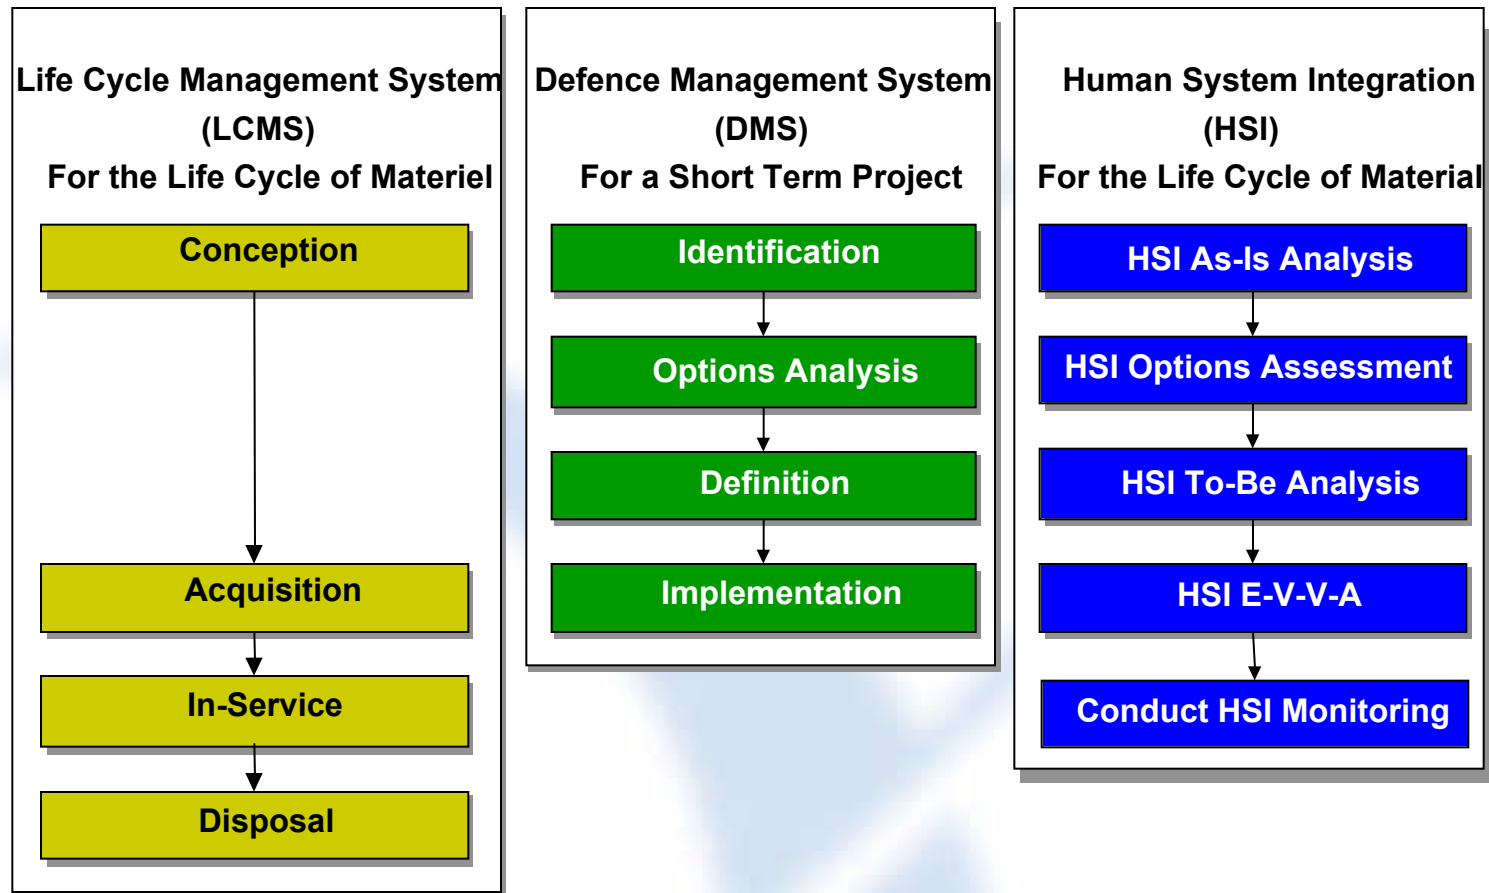

HSI Process MUST:

- Be simple
- be sequenced
- illustrate interrelationships and interdependencies
- map HSI with each domain
- map HSI with DMS
- accommodate developmental system vs COTS

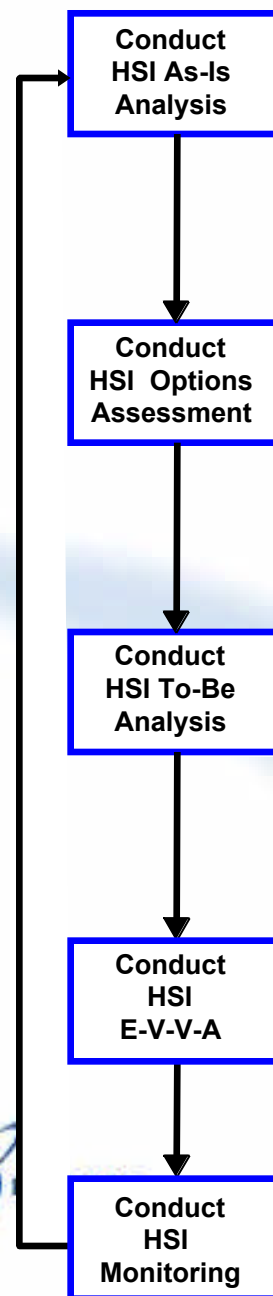

HSI Process - Unique ?

- Integration
 - **Integrated** processes of HSI domains
 - **Shared data repositories**
- Risk
 - an additional layer?
- Benefits
 - shared resources, shared data, re-use, common tool requirements

HSI Process

HSI Process

HSI Process

HSI Process - Data Repositories

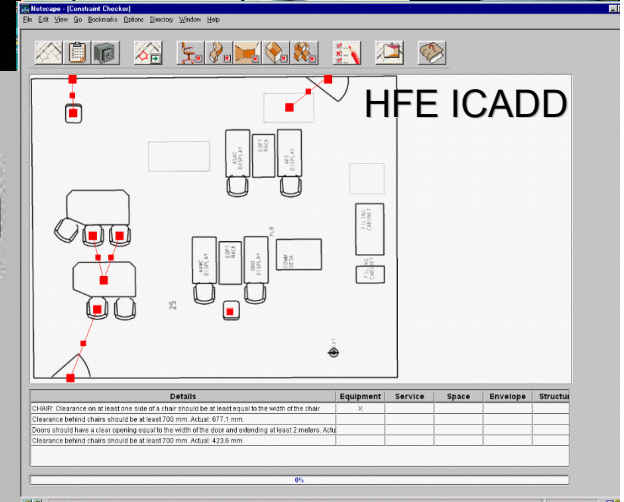

HSI Process - Domain Integration

DMS Process	HSI Process	HFE <input type="button" value="GO"/>	Training <input type="button" value="GO"/>
Identification	1.0 Conduct HSI As-Is Analysis 1.1 Identify HSI Resources 1.2 Describe Current System 1.3 Develop Current System TAD 1.4 Identify HSI Deficiencies 1.5 Describe Project	Lessons Learned and HFE Deficiencies Develop HFEPP	Needs Assessment (Preliminary) Concept for: Performance Analysis , Cause Analysis , Identify Solutions Training Analysis Concept for Training Analysis Concept for Training Design Cost Estimate

HSI Process - On HSI Web Site

- Process Descriptions
- Process Flow Charts
- Process Domain Comparison Table
- Release on HSI Web Site for review and comment
 - use electronic means to invite review
- Link to ADM(Mat)'s DBCM “DND Acquisition Desktop” (Sept 2000)

HSI - TOOLS

HSI PROGRAM - TOOLS

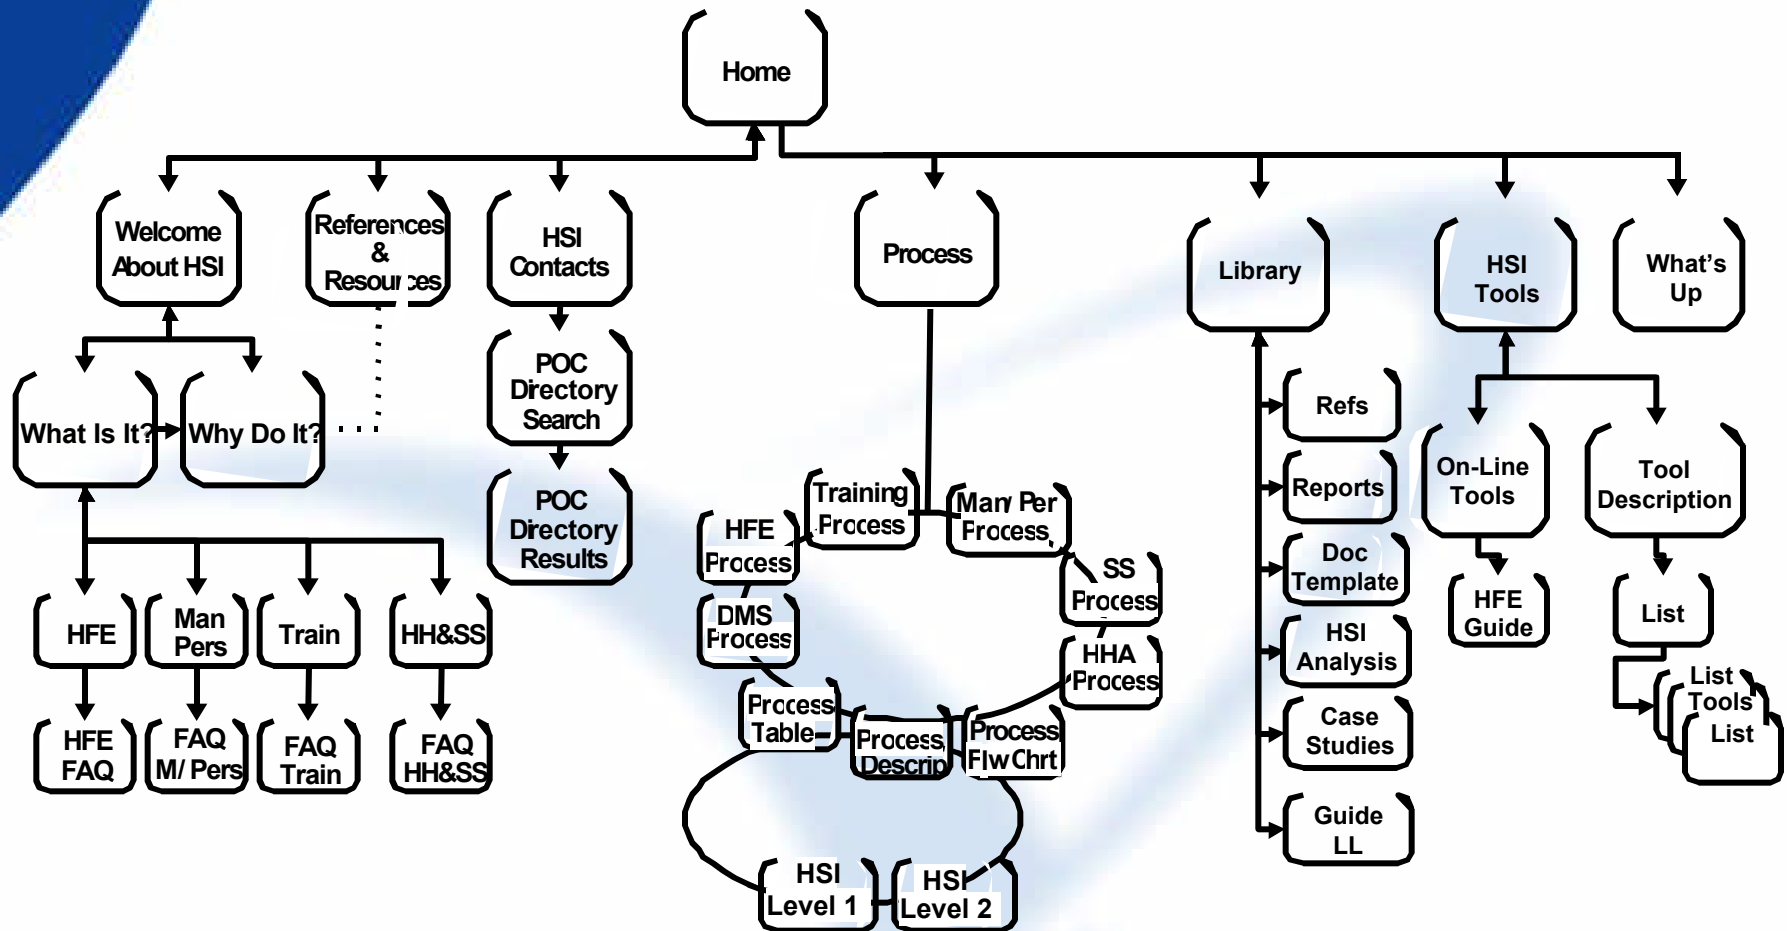

- Focus on Modeling and Simulation (M&S)
 - Re-usable workflow, workspace models
 - Re-configurable simulations
 - Libraries of analysis, measures, and criteria
- Integrated Tool Suite
 - Data output from one analysis, input to next analysis.
 - In line with SBA's "SMART" concept of use and re-use of M&S

Future Activities - 2000/2001

- HSI Team
 - finalize and translate registration tools
 - conduct registration
 - establish *e-Newsletter*
- HSI References/ Reports/ Templates/...
- Performance Measures
 - Develop Guidance document (brief)
 - Document case studies (MA&S)
 - Contribute to “Tech Demo Projects” (i.e.: US ACTD) interested in using HSI tools (IPME/Safework...)

HSI Tools - Web Site(s) Sept 2000

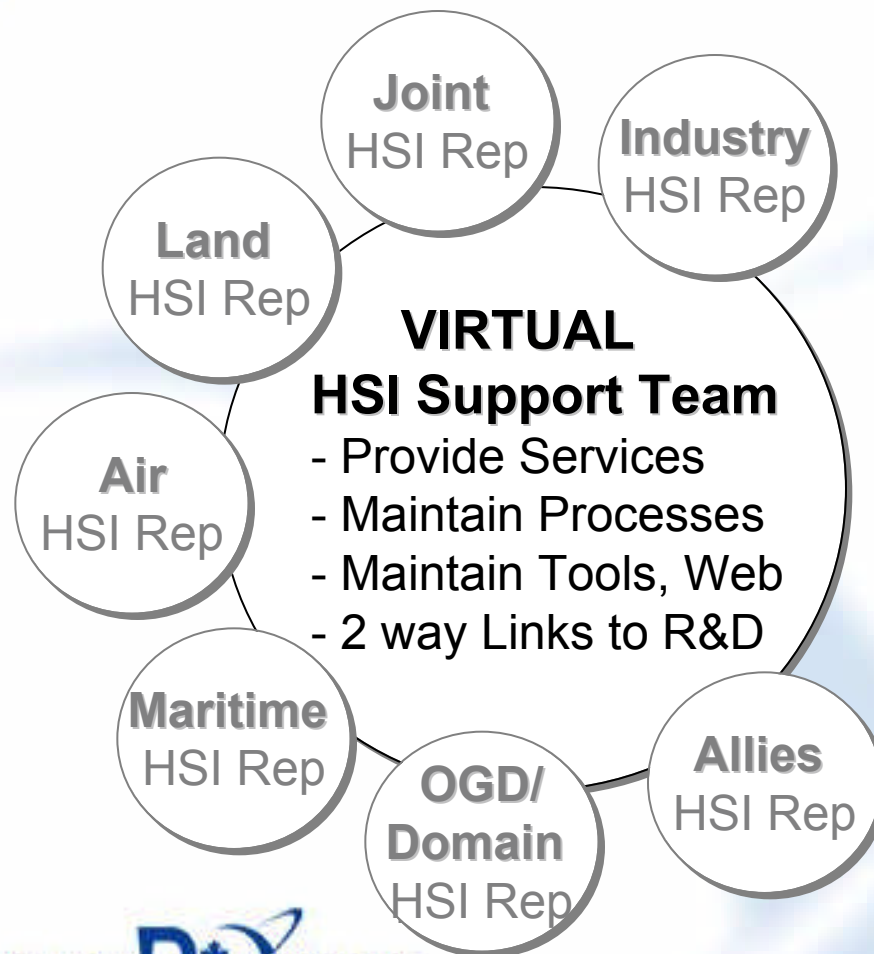

Summary: CANADIAN HSI Perspective

- A HSI Steering Board
 - A Virtual Support team
 - A documented HSI process.
-
- Enhanced HSI tools, techniques technologies, from R&D lab, focusing on M&S.
 - Demonstration of the process and tools in actual Materiel Acquisition & Support projects (MA&S).
 - A HSI Web site linking MA&S personnel

PEOPLE, PROCESS, TOOLS

Acquisition
& Support
Projects**

HSI PROGRAM - COLLABORATION

- **Canadian HSI Program will be seeking collaborators.**
 - Seats on HSI Steering Board.
 - Share in HSI Process Development.
 - Share in HSI Tool Enhancements.
 - Share HSI Application Case Studies.
- **Collaborators will be sought from:**
 - International Defence Community
 - Other Government Departments (eg: Transport).
 - Canadian Industry (eg: Nuclear Power, Telecom.)

Defence R&D Canada

provides S&T leadership
in the advancement and
maintenance of Canada's
defence capabilities.
